

HOUSING HACK — A HACKATHON FOR EVERYONE

OCTOBER 20 - 22, 2017

Interested in **social innovation**?

Want to apply **technical expertise** to real-world problems?

Looking to network with professionals & social entrepreneurs shaping the **future of housing**?

Housing Hack is a hackathon designed to address the challenge of available and liveable housing in the Barrie area. This is a significant and timely issue as only 32% of Barrie's resale-property prices currently meet the definition of affordability.

As a collaborative initiative of the Barrie & District Association of Realtors (BDAR) and the City of Barrie, Housing Hack will bring together innovative thinkers to apply a critical and creative lens to the housing market.

Hackathon participants will be required to expand the limits of their creativity to find insightful solutions to the issue of housing availability and affordability in the Barrie area. Solutions will be accepted in the form of web and mobile applications as well as data-driven insights.

What's in it for the winners?

Top 3 winning teams will receive cash prizes totalling \$5000.

Whether you're a data scientist, graphic designer, social entrepreneur, real estate agent, housing developer, or community advocate there is a place for you at Housing Hack.

Help shape the future of housing in the Barrie area. Sign up at housinghack.ca.
