Under the Government of Ontario's greenhouse gas emissions regulation each of Enbridge Gas Distribution Inc., Union Gas Limited and EPCOR Natural Gas Limited Partnership are required to develop plans to meet their cap and trade compliance obligations. Each of the natural gas utilities have applied for approval to recover the costs associated with their 2018 cap and trade compliance plans. If approved, the costs of the proposed plans would raise natural gas rates by \$0.40 to \$0.50 on average per month starting January 1, 2018 for residential customers. The exact amount of the increase will depend on the amount of gas you use and on your gas utility. Other customers, including businesses, may also be affected.

The Ontario Energy Board will assess the cost-effectiveness of each of the cap and trade compliance plans filed by the natural gas utilities to determine whether the gas utilities can recover those costs in the rates they charge customers.

Enbridge Gas Distribution Inc. and Union Gas Limited have also asked for approval of a jointly developed procurement and funding model to introduce renewable natural gas into the Ontario market.

THE ONTARIO ENERGY BOARD WILL HOLD A PUBLIC HEARING

The Ontario Energy Board (OEB) will hold a combined public hearing to consider the requests made by each of Enbridge Gas, Union Gas and EPCOR Natural Gas. We will question each of the gas utilities on their cap and trade compliance plans and on each of their cases for a rate change to implement those plans. We will review the proposals of Enbridge Gas and Union Gas in relation to the renewable natural gas procurement and funding model. We will also hear questions and arguments from individual customers and from groups that represent customers of Enbridge Gas, Union Gas and EPCOR Natural Gas. The OEB will assess whether the compliance plans are cost-effective to determine whether the recovery of the cap and trade costs from customers is reasonable, and will determine whether to approve the renewable natural gas procurement and funding model.

The OEB is an independent and impartial public agency. We make decisions that serve the public interest. Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.
