I unable to attend. Is there any way to voice my opinion? By switching the stop signs, they are now enabling traffic to not slow down at an intersection that has school bus stops, kids crossing and a lot of people walking. By making Greenfield straight thru, they are allowing traffic not to have to slow down along Greenfield. There is NO sidewalks west of Briar on Greenfield. It is bad enough that cars and kids share the roadway here, now the cars do not have to slow coming up the hill east of Briar on Greenfield and so they will travel faster onto a portion of roadway that has no sidewalks and lots of people as there is also a large park nearby.

This is a bad decision that will eventually lead to close calls or tragedy. With not stop on Greenfield, this is destined to be a shortcut from Little and Bayview down to Burton. If any thing this should be a four way stop to slow all the traffic. As again, there is lots of people walking and no sidewalks west of Briar.

Can this please be forwarded to the appropriate people.

Thanks very much for the email.
