

# **“Collaborate Barrie”**

**A Made-in-Barrie Approach to  
Collaborative, Risk-driven  
Community Safety and Well-Being**

*Welcome to*  
**BARRIE**

## What is 'Collaborate Barrie' About?

- It is a joint project amongst community partners; to address those in the community facing the highest need, with Police as one of the champions to move it forward
- It is about using our existing and combined resources and our investments in a new way to:
  - break down silos
  - increase efficiencies, and
  - mobilize responses within 24 to 48 hours
- It is about addressing issues at the front-end to see dividends down the road
- The situation table, which forms part of 'Collaborate Barrie' is not a new body and does not keep any case-records, and only tracks de-identified data on risks and situations for the purposes of identifying opportunities for systemic change

# The Privacy Process

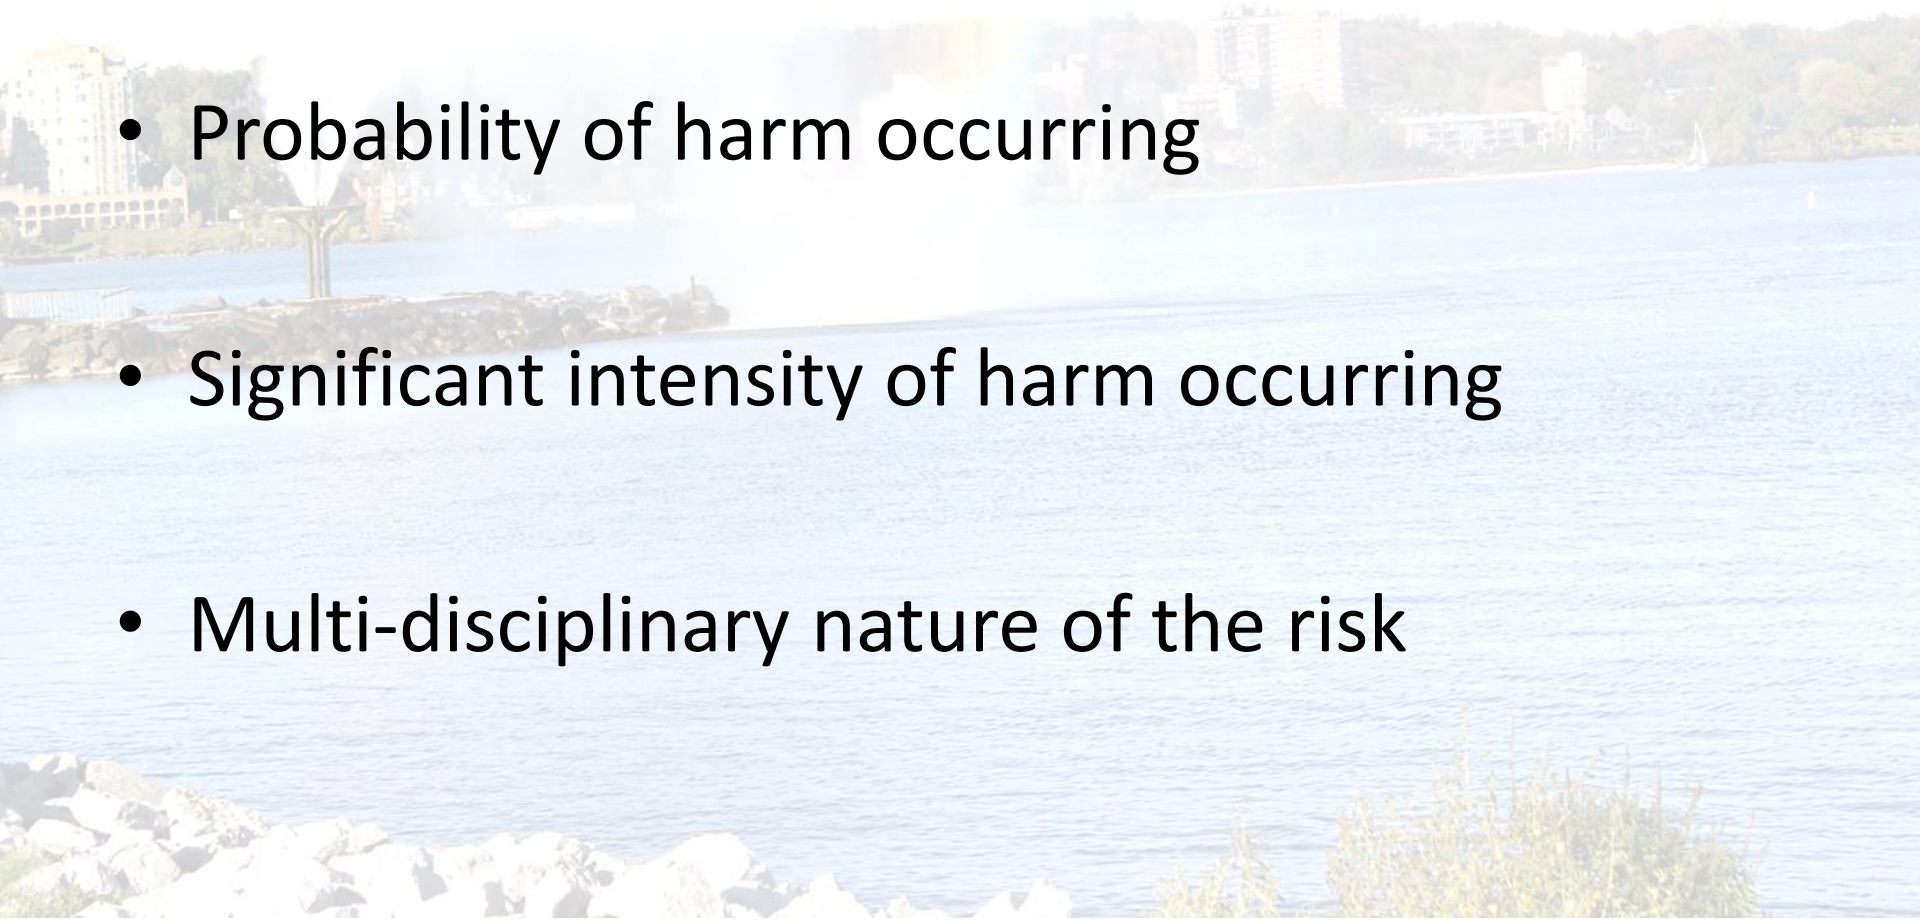

A multi-sector working group conducted a lengthy study of federal and provincial privacy policies.

The Four Filter process used in the situation table discussion protects privacy and allows for non-identification until the group agrees that acutely elevated risk exists and that imminent harm will occur.

Only the agencies involved in the final level of assistance are privy to details and further discussion which allows for a comprehensive and collaborative plan.

# Definition of Acutely Elevated Risk

- Significant community interest at stake
- Probability of harm occurring
- Significant intensity of harm occurring
- Multi-disciplinary nature of the risk
