Subject: RE: Irrigation Exemption Cancellation

Wendy:

The Corporations here have had exemption metres installed on the irrigation sprinklers as this water does not enter the City's waste water system. The City of Barrie read these metres monthly and discounted the water used for irrigation of waste water charges. This exemption has now been cancelled and the Corporations feel this is not fair especially considering they have fought with the City for 10 years to have their garbage picked up by the City at the City's cost seeing it has always been in the taxed amount here to residents.

Now the City cancelled this waste water exemption and the Corporations are back to paying for a service they are not receiving.

Thanks,

Richard Ellis
