Description of Work

I cabled in through the floor cleanout up to 63' and was not able to get the blockage. I cabled in 3 times with multiple heads. Every time I got to the blockage the cable machine would bind. I believe the line is collapsed. I have located the entire line all the way from the cleanout in the floor in the basement to the collapse. The collapse is right at the end of the lane way about 9' down. I have pinned a few pics and a video of the camera inspection. We will contact the customer in the morning with the options to resolve the situation.

Description of Work

We performed a hydro scrub from the floor cleanout up to 64'. We attempted to unblock the drain 3 times with the hydroscrub machine. The camera inspection revealed the line is collapsed. We did see some gravel in the line. I have recorded a video and have pinned this to the file. We will need to do a route to replace the line. I have kept the invoice open for a future date. At customers request. Shaun said we could change something the date. I have gotten the payment of 1465.40
