APPENDIX 9B

HEWITT'S SECONDARY PLAN - MASTER PLAN

November 2016

- The Potential Floodline reflects a floodline which could result from modifications such as culvert improvements which reduce areas subject to flooding. It is recognized that these floodlines have not been approved and that the detailed delineation of the Regulatory Floodplain is required to be completed at the planning/design stages of development. The actual developable area will be defined at that time.
- A partial Public Elementary School with potential to be realized in the future if a municipal comprehensive review results in a settlement area boundary expansion
