

THE MONARCH ULTRA
BARRIE CITY COUNCIL PRESENTATION
APRIL 26, 2021

THE POPULATION OF MONARCH BUTTERFLIES HAS DROPPED 80% OVER THE PAST 20 YEARS.

Source: [National Geographic](#)

Why is this happening?

- Climate change
- Habitat loss
- Pesticide use
- Disease
- Deforestation

Why does this matter?

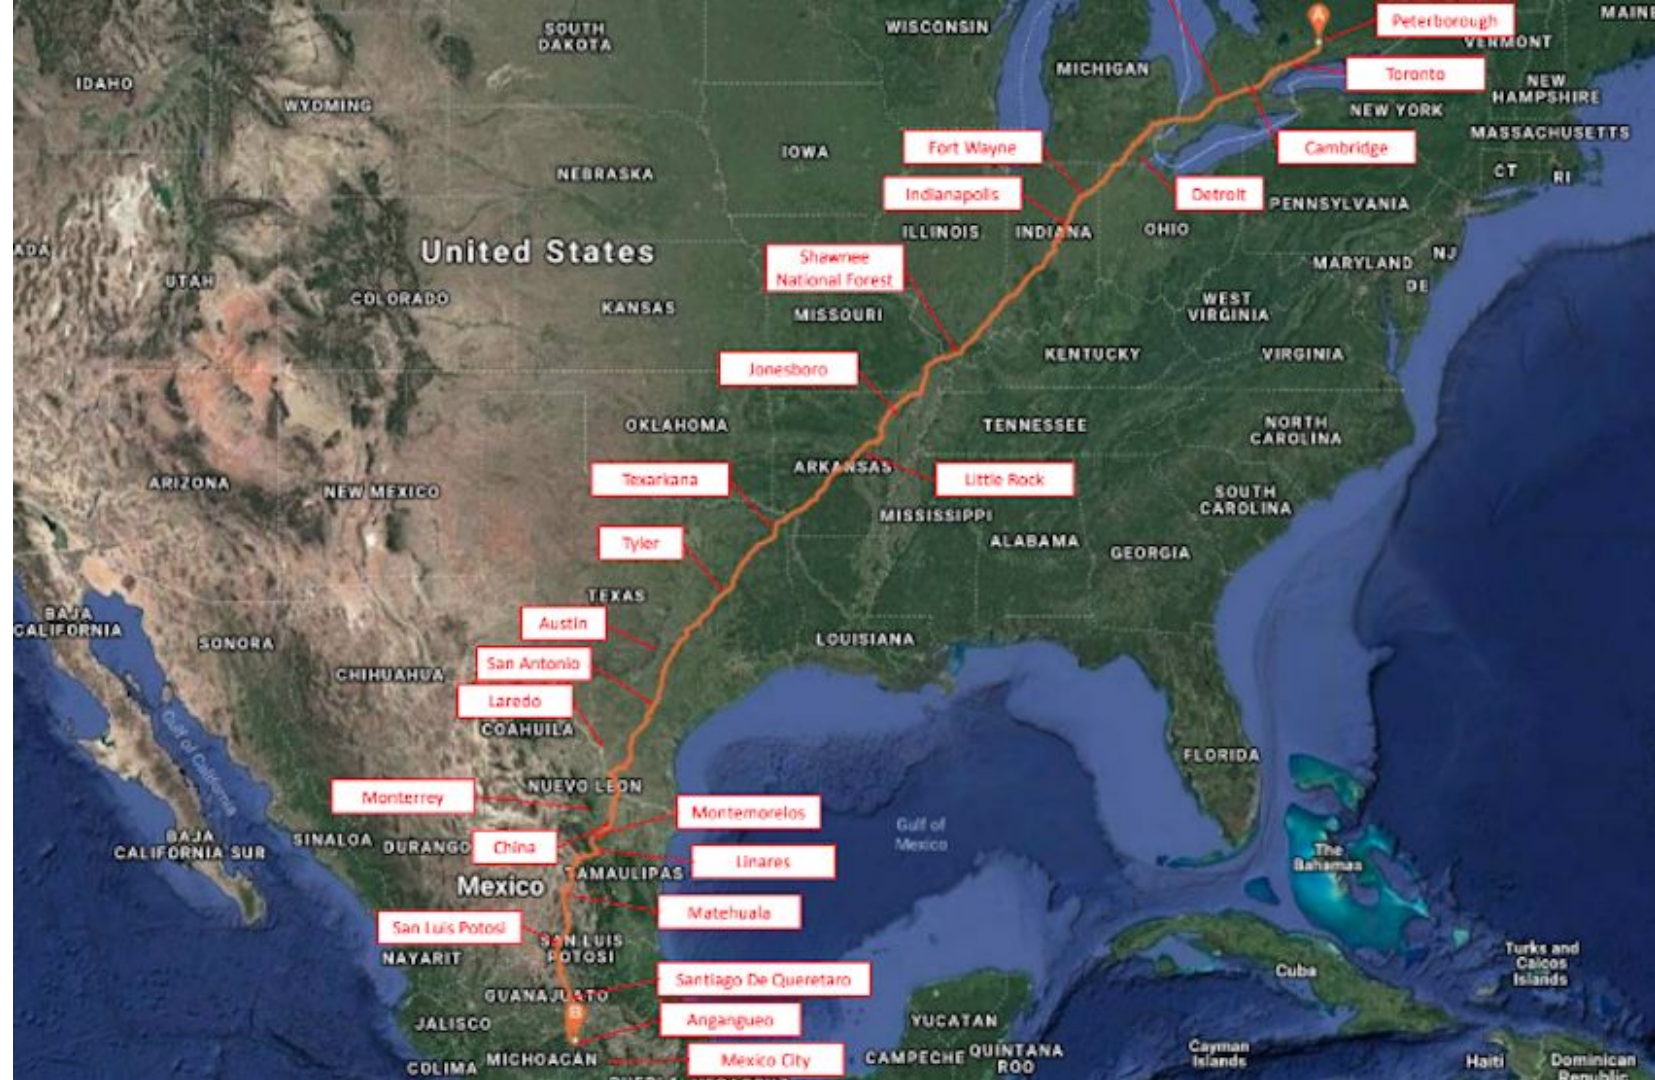

Monarch butterflies are important pollinators, and need the same habitats as many other pollinators. Their health and their dramatic population decline are the proverbial 'canary in the coal mine' for all pollinators and to our current climate crisis.

Losing monarch butterflies and pollinators will have devastating impacts on food security systems and natural ecosystems.

A high-angle, wide shot of a mountain trail. The trail is a narrow, light-colored path that winds through dense, green forest. Several runners are visible at different points along the trail. The lighting is bright, suggesting a sunny day, with strong shadows cast across the forest floor and the runners' bodies. The overall scene conveys a sense of outdoor recreation and connection with nature.

OUR MISSION:

UNITE COMMUNITIES ALONG THE MIGRATORY PATH WITH COMMON GOALS OF EARTH
STEWARDSHIP AND BIODIVERSITY CONSERVATION.

PETERBOROUGH LAUNCH PARTY - SEPT. 19TH, 2019

REYNOSA, TAMAULIPAS

AMERICAN SCHOOL FOUNDATION, MONTERREY

"So proud of you all! It's surreal to see you on the San Antonio City Council TV! The sacrifices you are making to share your message are so very real, and we witness that through your speech. Beautifully spoken. We love you."

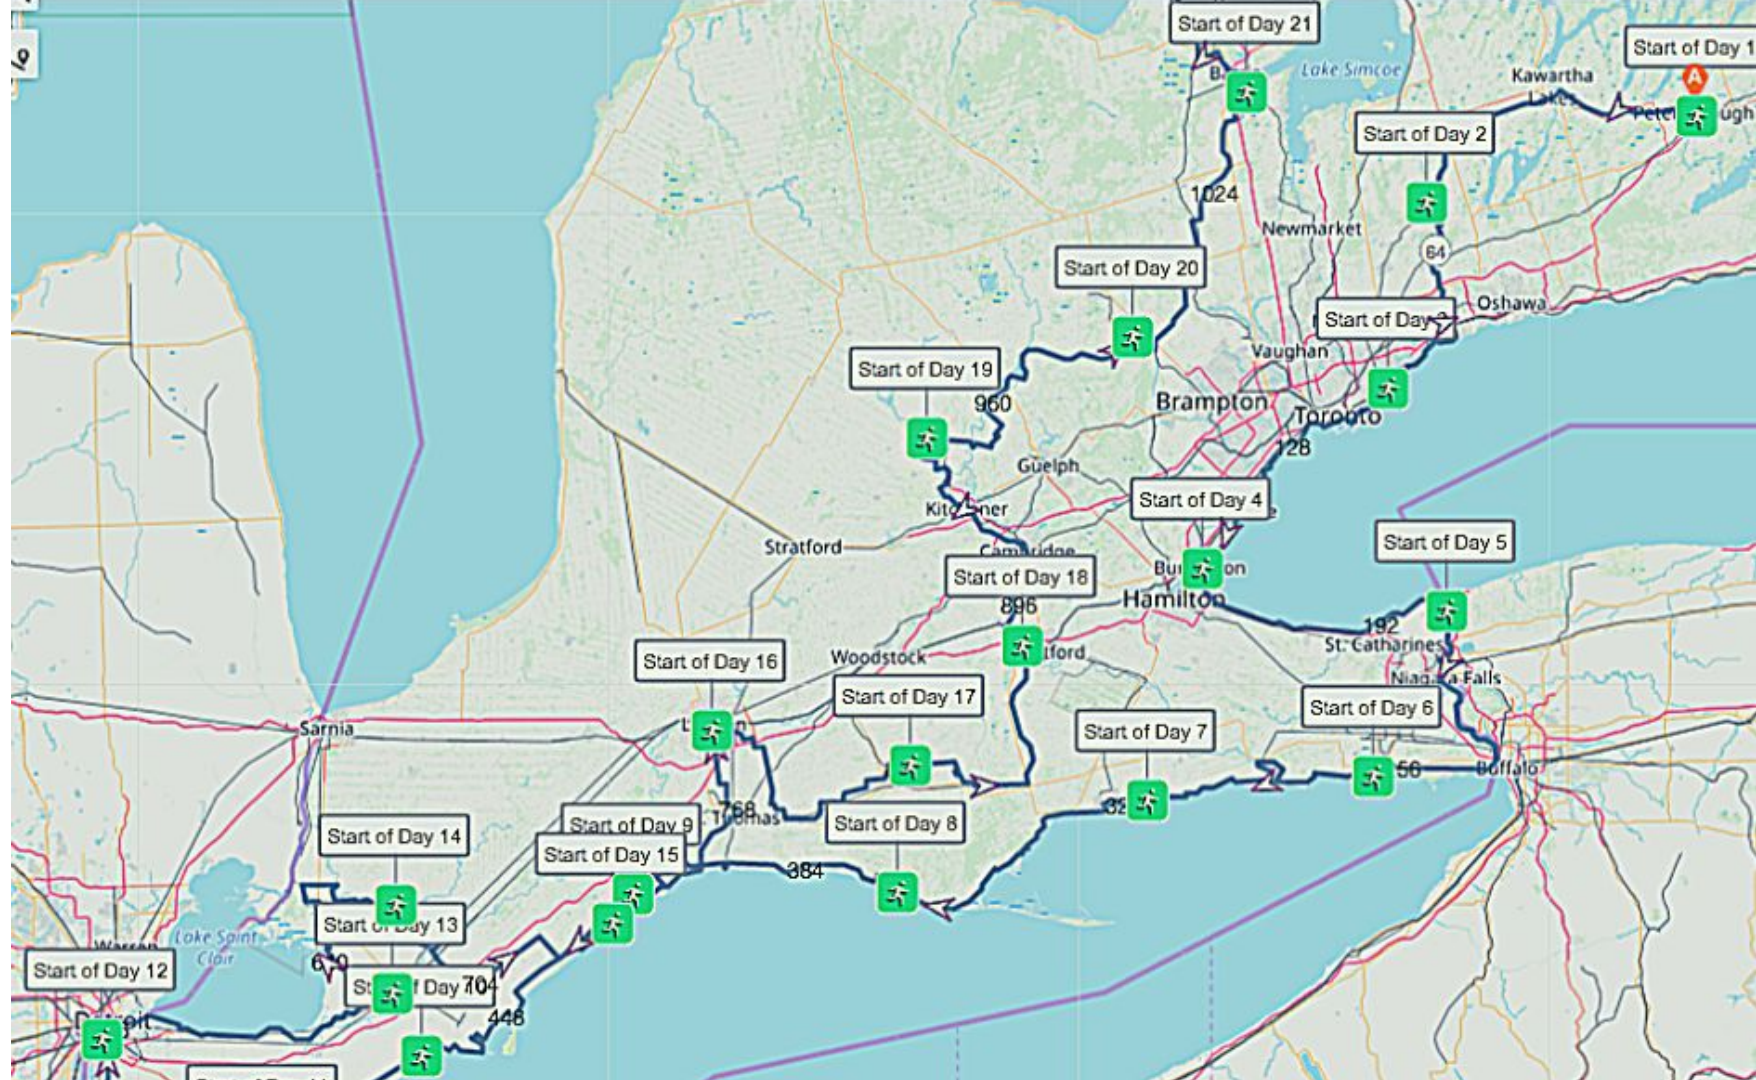

MACHEROS, MEXICO
