File #:	TMP-27128	Version:	1	Name:	
Type:	Discussion Item	Status:		Received	
File created:	4/9/2021	In control:		Active Transportation and Sustainability Advisory Committee	
On agenda:	5/4/2021	Final action:		5/4/2021	
Title:	REDUCING GHG EMISSIONS THROUGH PARK AND YARD NATURALIZATION AND EDUCATION				

Kelly Patterson-McGrath summarized her presentation from the previous Committee meeting concerning the 2-Cycle Engine Reduction. She provided suggestions, such as completely banning the use of leaf blowers for City use for maintenance and setting an example for the Community when planning to reduce greenhouse gas emissions.

Kevin Rankin, Supervisor of Urban Forestry and Natural Areas Stewardship, confirmed that going from gas powered equipment to battery powered equipment is currently being done with all equipment that can be changed over to battery rechargeable units. He expressed that it would be very costly to get rid of all the current backpack units and replace them with battery units immediately.

The Committee discussed some different ideas, strategies, and issue.
